Graphic presentations made faster, easier, sharper with

BRADY QuikLine^{T.M.} SELF-STICKING TAPES

PRECISION SLIT

in BIG Economical 648" (18 yd.) Rolls

Three Different Types . . . Seven Bright Colors . . . Eleven Most Used Widths . . . Two Patterns . . . **plus four fluorescent colors!**

Now draftsmen, artists, analysts, *anyone* can draw charts, graphs, "visuals," layouts and reproduction masters of professional quality faster, easier, more accurately.

Draw with Brady Quik-Line self-sticking tapes. Save drafting costs by cutting "board time" as much as 35% . . . allow more time to apply your professional skills.

Brady Drafting Tapes are manufactured to rigid specifications . . . meet every qualification required for drafting application. Brady's specially-compounded clear adhesives stick tightly to paper, board, wood, plastic or metal surfaces, yet may be peeled clean and residue-free when corrections are made immediately. Simply lift off the undesired tape — no erasing, scraping or smudging as with outdated pen-and-ink methods.

Tape surfaces are durable and fade-resistant for long-lasting clarity and appearance. Physical properties of Brady tapes allow precision narrow slitting to close tolerances . . . clean, sharp edges . . . no shrinkage once tape is applied. Presentations made with Quik-Line Tapes reproduce satisfactorily by photography and most other reproduction methods.

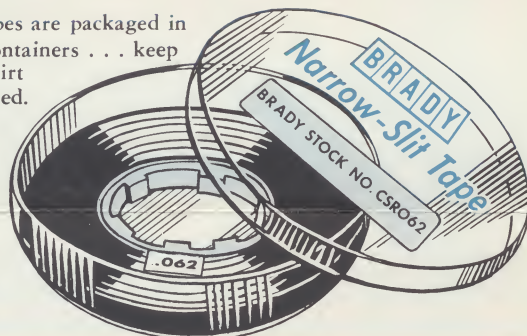

Brady Quik-Line Tapes are furnished on special splined cores for use with Brady Tape Pen. This Brady exclusive assures proper "centering" of tape in magazine of the Tape Pen . . . controlled feed-out at proper tension when precision width tape is applied. (Brady splined cores will fit all standard dispensers.)

PLASTIC PACKAGES FOR PROTECTION, CONVENIENCE

All Brady Quik-Line Tapes are packaged in reusable clear plastic containers . . . keep the rolls of tape free of dirt and factory fresh until used.

EACH ROLL IDENTIFIED

The width of each and every roll of Brady Quik-Line Tape is plainly marked on the side of the roll. Saves time, assures accuracy.

BRADY QUIK-LINE TAPES ARE STOCKED IN FULL 648" LONG ROLLS AND IN THESE POPULAR WIDTHS:

.015" 1/64"	.031" 1/32"	.062" 1/16"	.080" 2/25"	.093" 3/32"	.100" 1/10"	.125" 1/8"
.156" 5/32"	.187" 3/16"	.200" 1/5"	.250" 1/4"	.375" 3/8"	.500" 1/2"	

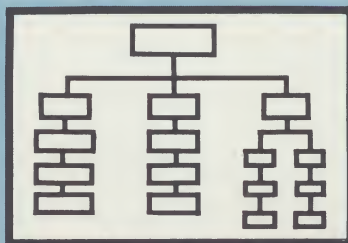

(All tapes are not stocked in all widths. See stock list on page T26.)

*NOTE: These sizes cannot be used in Brady Quik-Line Tape Pen.

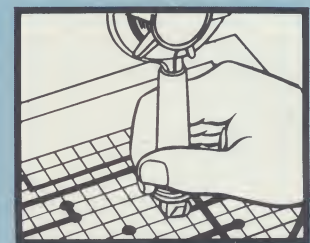

BRADY QuikLine TAPES AND TAPE PEN

Draw maps "from scratch" or mark existing maps with sales areas, contours, boundaries, etc.

Make organizational charts and visual aids.

Draw accurate masters for printed circuit boards.

Brady Quik-Line Tapes are furnished from stock in 648" (18 yd.) long rolls in these most-used materials for printed circuit work, drafting, charting and graphing:

Brady B-204 Matte Black Photographic Tape — reflects far less surface light than the "blackest" tape heretofore available. Precision-slit to $\pm .002"$. Saves drafting time by eliminating highlights and glare . . . costly clean-up, tedious negative opaquing and retouching. Recommended for curved or straight line work. *Dead-Stretch* feature means tape will stay put on drawing . . . won't creep or "return," even on sharp radii. Use with Brady B-202 Printed Circuit Shapes. Conform to Military Standard MS 16912 (Nord). See page T26 for stock list and prices.

Brady B-225 "See-Thru" Red Tape is translucent, permitting greater accuracy in locating conductor lines on layout grids and for stripping photographic and litho negatives. Precision-slit to $\pm .002"$. Thin (.002") film produces clean outlines with greater dimensional stability. Recommended for straight line work only. Use with Brady B-225 Printed Circuit Shapes. See page T26 for stock list and prices.

Chart Tapes: B-597 dull finish tape stocked in four widths . . . in six solid colors, plus black or red pattern tapes as shown on page T26. Big 648" long rolls. Non-reflective. For statistical charts, planning boards, pie chart, bar graphs, process and flow diagrams, overlays, etc. See page T26 for stock list and prices.

NEW

B-223 Fluorescent Tapes in four vivid "glow" colors add new life and visibility to charts, graphs and presentations. Use for special effects, emphasis and dramatization on signs, displays and maps. Five widths, 1/32" to 1/4" on 648" rolls. See page T26 for prices.

Special Tapes: You can order Quik-Line Tapes slit to other-than-stock widths. Minimum order is \$25.00 and at least 24 identical rolls of any one color and width must be ordered. Price is the same as the next larger stock width. Add 10% to this price for 24 to 99 rolls.

BRADY QuikLine TAPE

The Brady Quik-Line Tape Pen gives engineers, draftsmen, artists and layout men a new, fast, accurate method to draw with self-sticking tape as easily as with a pencil. Not a mere applicator, gimmick or toy, the Tape Pen is a precision drafting instrument designed to produce quality professional presentations.

Use the Tape Pen and Brady Precision-Cut Drafting Tapes to apply straight, curved or irregular lines — from 1/64" through 1/4" wide. Lines are uniform in width and density . . . accurate for placement to .010". Use freehand, or with straight edge, French Curve or beam compass.

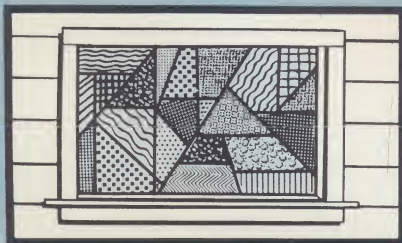

The Quik-Line Tape Pen is faster and easier to use than a ruling pen. No messy inks — no clean up — no waiting for ink to dry. Saves time because it requires no filling until the entire 648" long roll of Quik-Line Tape is used. Built-in blade cuts off tape at end of line.

The Tape Pen is designed for easy fatigue-free drafting . . . contoured and balanced for smooth operation on horizontal, tilted or vertical surfaces. Pen swivels full 360° without operator's lifting pen from board or moving wrist.

The Quik-Line Tape Pen is manufactured from high impact plastic . . . is virtually indestructible in normal usage. It's packaged in an attractive leatherlike plastic covered instrument case. Full instructions, replaceable parts, FREE roll of Quik-Line Tape included with each instrument. See table T22 on Page T26 for prices.

SEE NEXT PAGE FOR

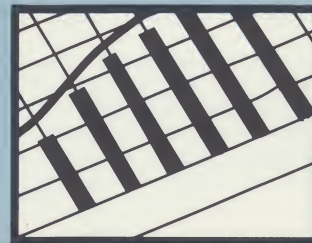

SAVE TIME . . . ASSURE ACCURACY AND PROFESSION

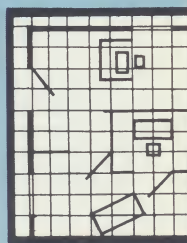

Decorate backgrounds, show cases and windows.

Write or letter store windows, signs and walls.

Make graphs for sales meetings, financial reports, medical seminars and school work.

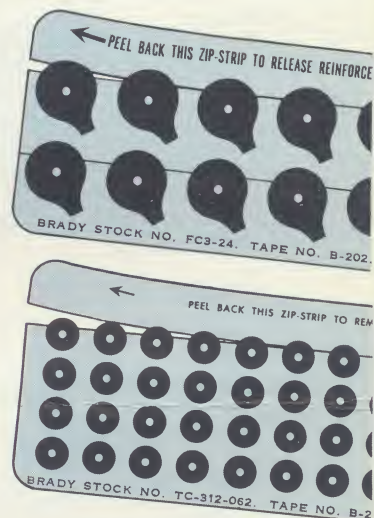

Lay out plant, office and warehouse areas.

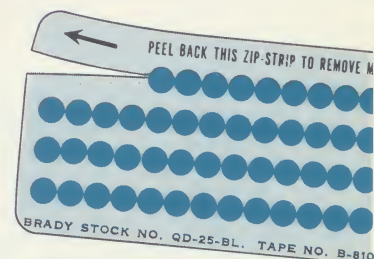

Ask for information about these other

BRADY drafting products . . .

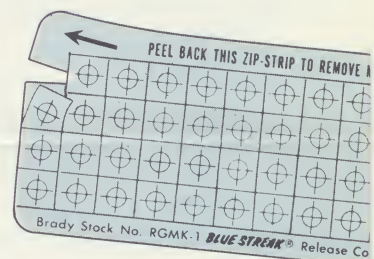

PRINTED CIRCUIT DRAFTING AIDS — Terminal circles, elbows, other shapes on handy Dispenser Cards, ready for use. Use with Brady B-204 and B-225 Quik-Line Connector Strips. Write for Bulletin 163.

QUIK-DOTS — Self-sticking vinyl dots for chart and graph work. Quarter inch circles stocked in 16 different colors. Furnished on handy Dispenser Cards for fast application. Write for Bulletin 524.

REGISTER MARKS — Self-sticking $\frac{3}{4}$ " diameter "targets" for perfect register of overlays. Printed on B-966 clear polyester film. Furnished on handy Dispenser Cards. Ask for Bulletin 542.
